## Miney Company: A Data Racket Download For Pc In Parts

Download ->->->-> <http://bit.ly/2SLh5yK>

### About This Game

Miney Company: A VR physics-based racquetball-inspired game where you 'work from home' for your new employers Miney Company. Your job is to collect data blocks from around the universe for Miney Company to profit from by selling to the highest-bidding potentially nefarious multinational corporations. With 13 playable levels, multiple types of data-collecting mechanics, and different types of rackets, you can smash, hunt, and protect your data from rival data miners while hanging out with your location coordinators Albert, Benjamin, and Cecil.

Miney Company wants to connect VR enthusiasts with the data mining needs of fictitious multinational corporations. Our online data gathering matches freelance labor with borderless corporations and their bottomless demands for data, allowing labor flexibility and low overhead as well as high employment satisfaction for people who like to work in their pajamas from home.

"Eh, It's a job. And it's flexible enough that it doesn't take away from my ride-share driving gig. I also don't have to put on pants for it, so there's that. Unlike my ride-share gig..." —Albert

"Miney Company sure knows how to look out for their employees! Wait, I mean look at their employees. They aren't too into data privacy if you know what I mean." —Benjamin

"It's not so much of a job as it is something you waste time doing and are rewarded with a fiat currency." —Cecil

**Beta 7 Announced:**

Many apologies for the delay in updates, we now have a date for Beta 7! April 27th will bring about the following improvements:

- Able to have two different paddles selected at once, for Hammer/Racket combo action
- Graphical improvement to ALL levels!
- New block formations
- and as always, numerous bug fixes

We're getting close to our official release on December 1st, 2019, where we hope to have the following:

- Minibosses
- At least one more level
- Finalize visual effects
- Ten more paddles

We know you have plenty of VR games to choose from, so thank you for choosing Miney Company. Onward to April 27th!

**Beta 3 Has Arrived!:**

Hello all you out there in Steamland! We've recently updated Miney Company to version Beta 3, which includes the following improvements:

- \* Lowered application pre-launch load time to average of 35 seconds
- \* Added basic achievements (more on the way!)
- \* Added music to Data Pipe Trunk Distribution Venue
- \* General optimizations

The Beta 4 milestone has been scheduled for March 16th, check back soon for more updates. We appreciate your interest in Miney Company and your enduring patience throughout the development process!. **Beta 7 Delayed:**

Hello everyone! Unfortunately, due to labor shortage we weren't able to meet our April 27th deadline for Beta 7. As a change to our roadmap, we've decided to roll Beta 7 into our Final Release, due December 1st 2019. We are confident we'll be able to meet this deadline with the promised features.

Again, thank you for playing Miney Company and supporting independent games!. **Beta 4 Delayed Due To Utopia.net DNS Hijack:**

Hey folks, I'm sad to say we'll have to delay our Beta 4 release as our development team was hit by the [Utopia.net](https://www.utopia.net) DNS hijack malware. We're pushing our Beta 4 release date to May 4th while we scrub our machines of the malware and do a security overhaul of our network. This may be a good opportunity to check to see if you have the malware yourself:

Use regedit to search for an entry inside **HKEY\_LOCAL\_MACHINE\SOFTWARE\Microsoft\Windows NT\CurrentVersion\NetworkList\Nla\Cache**'s subfolders named "[Utopia.net](https://www.utopia.net)". If it's there, congratulations, you're infected!.

**We're live on Early Access:**

Hello all,

We're live on Early Access and have open Community Discussion Forums ready for feedback, bug identification, and more.

---

Let us know what you find and how you feel, and we'll try to address those issues while also working on the updates we'd like to see to make this world even more uncanny.
